DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Plasma Display with specific fluorescent structure.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1⁷ are rejected under 35 U.S.C. 102(e) as being anticipated by Asano et al. (US 6,106,992).

Asano discloses a vacuum ultraviolet radiation excited light-emitting device with a discharge space filled with a rare gas between a front faceplate and a rear faceplate, a fluorescent material layer provided on the front faceplate having a thickness of no more than about 7 um.

Regarding claim 2, Asano discloses a fluorescent material layer on the rear faceplate.

Art Unit: 2879

Regarding claim 3, Asano discloses a rare gas lamp.

Regarding claim 4, Asano discloses the fluorescent material layer on the rear faceplate has a thickness of not less than about 30 μm .

Regarding claim 5, Asano discloses a plasma display panel.

Regarding claim 6, Asano discloses the fluorescent layer has a thickness of not more than about 20 μm .

Regarding claim 7, Asano discloses the fluorescent material having an average primary particle diameter of not more than about 1 μm .

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Janning (US 5,982,082) discloses having a phosphor layer of 1200 angstroms.

Art Unit: 2879
